**Management Discussion and Analysis**  
**For**  
**International Northair Mines Ltd.**  
**(“Northair” or the “Company”)**

The following management discussion and analysis (the “MD&A”) of the Company has been prepared as of June 21, 2013 and is intended to supplement and complement the Company’s audited annual consolidated financial statements for the year ended February 28, 2013. All financial information has been prepared in accordance with International Financial Reporting Standards (“IFRS”) and all amounts disclosed are Canadian dollars unless otherwise stated.

**Nature of Business**

Northair is a mineral exploration company actively engaged in the acquisition, exploration and development of strategic mineral properties throughout North America with a particular focus in Mexico. The Company is listed on the TSX Venture Exchange (“TSXV”) and trades under the symbol “INM”. In Mexico, exploration is conducted by its wholly owned subsidiary, Grupo Northair de Mexico, S.A. de C.V. (“Grupo Northair”).

**Highlights for the year ended February 28, 2013**

- On January 31, 2012 the Company announced its fiscal 2013 Exploration Programs for its La Cigarra and Sierra Rosario projects. At the La Cigarra Project, the Company outlined its planned work program which was to include a minimum 7,500 metre core drill program, an expanded metallurgical study, an initial resource calculation and a compilation of the information required to initiate a scoping study. At its 50% owned Sierra Rosario Project, the Company’s planned work included geological mapping, sampling, trenching and drilling.
- The Company’s work on the La Cigarra project continued to report positive results, and led to an expansion of its planned core drill program by approximately 4,500 metres- intended to provide additional information for its planned resource estimate and to follow up on higher grade zones that emerged during prior drilling.
- The Company closed a non-brokered private placement with the issuance of 21,784,344 Units at a price of \$0.28 per Unit for gross proceeds of \$6,099,616. The financing included participation from Coeur d’Alene Mines Corporation purchasing 10,750,000 Units for gross proceeds of \$3,010,000 and International Minerals Corporation purchasing 1,786,000 Units for gross proceeds of \$500,080. Each Unit was comprised of one common share and one half share purchase warrant. Each whole warrant entitles the holder to acquire one common share of Northair at a price of \$0.40 for a period of 18 months. The warrants are subjected to an accelerated exercise provision if the share price of Northair closes at or above \$0.85 for 10 or more consecutive trading days.
- The Company announced the appointment of Dr. Frederick T. Graybeal to the Company's Advisory Board.
- The Company signed a binding agreement with Focus Ventures Ltd. ("Focus") whereby Northair granted Focus and its subsidiary the option to acquire a 65% interest in the Company's El

Reventon Silver Project (the "Project" or "Property") located in the State of Durango, Mexico. The Agreement allows Focus to earn a 65% interest in a joint venture on El Reventon by incurring US\$2,000,000 in cumulative exploration expenditures over three years from the Agreement Date. The exploration expenditures include a commitment of US\$250,000 in the first year and at least 2,000 metres of drilling completed within three years from the Agreement Date. Focus will be required to maintain all underlying obligations and make the following cash payments: US\$10,000 on signing and completion of a 10 day due diligence period; US\$75,000 on or before 12 months of the Agreement Date; and US\$150,000 on or before 24 months of the Agreement Date. Once Focus has earned its 65% interest, the Agreement will allow for either party's interest to be diluted for non-participation in the joint venture. Should either party's interest fall below a 10% threshold, its interest will be converted to a 1% net smelter return ("NSR"). Subsequently, the Company reported that Focus had completed its due diligence and commenced an exploration program on the property. In addition, the parties have agreed that once Focus has earned its 65% interest in the property by investing in exploration and making certain cash payments to Northair, Focus can increase its interest to 80% by completing a Feasibility Study and making the payment of \$100,000 to the Company.

- At the Sierra Rosario Project, the Company announced that its field work had identified a significant geophysical and geochemical anomaly comprising a target measuring approximately 1,400 metres in length and conducted a core drill program. Subsequently, the Company completed its drill program, which consisted of six core holes, totaling 1,392 metres and was designed to test a 600 meter long portion of the induced polarization geophysical and silver / gold geochemical soil anomaly. The most significant drill results were obtained in Hole SR-003 where a 7.5 meter interval returned 179.3 g/t silver and 0.287 g/t gold and a 4.9 meter interval assayed 66.7 g/t silver and 0.614 g/t gold. In Hole SR-005, located approximately 400 metres to the southeast of Hole SR-003, a 3.35 meter interval returned 84.1 g/t silver, 0.102 g/t gold and 1.59% lead. The Company also reported that a follow up geochemical program was completed at the Property. The additional work extended 3 existing lines towards the northeast and expanded the grid 600 meters to the southeast.
- In 2012, the Company signed an agreement with DFX Exploration Ltd. to further enlarge its land position by acquiring the rights to the Parral 1 concession, which surrounds the 6 core concessions at La Cigarra. Northair can earn 70% of a 4,080.8 hectare portion of the surrounding concessions and 50% of the remaining 18,220.2 hectares within Parral 1.
- The Company also entered an agreement to purchase the surface rights to approximately 1,098 hectares of a property adjoining and partially overlying the La Cigarra Project.
- La Cigarra has continued to report positive results from the latest metallurgical test work carried out on samples mainly from the San Gregorio Zone with recoveries of silver ranging from 85% to 90%.
- The Company provided a review summarizing the project and corporate highlights on its La Cigarra silver project. Northair also included a timeline outlining key objectives of its Strategic Plan for the 2013 calendar year.
- The Company announced the results of the maiden NI 43-101 Resource Estimate completed by Arseneau Consulting Services (ACS) in conjunction with JDS Energy and Mining Inc. (JDS) for its La Cigarra project. The resource estimate, constrained by a Whittle™ pit shell at an economic cutoff grade of 30 g/t of silver, comprises 50,494,000 ounces of silver (20,755,700

tonnes) in the Measured and Indicated categories grading 76 g/t silver and 3,515,900 ounces silver (1,780,000 tonnes) in the Inferred category grading 61 g/t silver;

Drill results on the La Cigarra Property received during twelve months ending in February 28, 2013:

*Note 1: Intervals with silver values greater than 500 g/t reported as 500 g/t.  
Note 2: Reported widths may contain intervals with values less than 10g/t silver.  
Note 3: True widths estimated +/- 80% of drill intercept.  
Note 4: Some sections of mineralization carry appreciable lead and zinc values.*

## **Highlights Subsequent to February 28, 2013**

- The Company granted 2,805,000 stock options at \$0.22 to directors, officers, employees and consultants. All of the options are exercisable for a period of five years from the date of grant;
- The Company reported that surface exploration, on the largely unexplored southern 3.5 kilometre portion of the La Cigarra system that lies on trend and immediately south of the Las Carolinas Zone, has led to the discovery of three (3) new zones. Northair refers to these zones as Las Venadas, La Soledad and Las Chinas. Each zone hosts a cluster of historic mine workings evenly spaced along the north-south trending mineralized system and exhibits geological similarities to the three (3) main La Cigarra showings to the north (La Borracha, San Gregorio and Las Carolinas). Surface sampling within these new zones returned significant silver values and Northair believes that the Las Venadas, La Soledad and Las Chinas zones all have potential for both high grade veins and bulk tonnage surface mineable silver deposits;
- The Company announced that Focus Ventures Ltd. has commenced a drill program totaling 2,000 metres in length at its El Reventon silver-gold property. Results will be disseminated when received;
- The Company's Board of Directors approved an Advance Notice Policy, effective May 31, 2013, to ensure, among other things, that all shareholders are provided with sufficient notice of the proposed alternative nominees well in advance of any vote of the shareholders.

## **EXPLORATION UPDATE**

### *Overview*

International Northair Mines Ltd. continues to concentrate its exploration activities in Mexico through its wholly owned subsidiary, Grupo Northair de Mexico, S.A. de C.V. The exploration programs described below were conducted under the direction of Fred Hewett, the Company's President and CEO, and a Qualified Person under NI 43-101. Mr. Hewett has reviewed the technical summaries.

### **Project Discussion**

#### *La Cigarra Project, Chihuahua*

The La Cigarra Project is located near the municipality of Parral, in the State of Chihuahua in north central Mexico. La Cigarra consists of a significant package of mineral concessions totalling approximately 32,000 hectares, which was acquired by the Company through option agreements, staking and purchase. Local topography is gentle and the Property has good road access and infrastructure.

La Cigarra was identified as an acquisition target by exploration staff late in 2008, as part of the Company's generative exploration program. Reconnaissance and initial sampling results completed by Northair confirmed numerous silver occurrences along a 3 kilometre trend of mineralization. The Company defined three potentially significant zones of silver mineralization from its initial sampling.

In 2009 the Company completed a program of geological mapping and surface sampling over the 3 kilometres trend concentrating on the three areas known as: the Las Carolinas, San Gregorio and La Borracha zones.

In July 2010, the Company completed an initial Phase I drill program totalling 1,455 metres in 15 reverse circulation drill holes. The program was successful in testing the three known mineralized targets on the property and intercepted significant widths of altered and mineralized sediments and volcanics.

In December 2010, Northair commenced its initial core drill program and to date has completed approximately 22,400 meters of core drilling in 139 HQ sized core holes.

In February 2013, Northair announced the results of the maiden NI 43-101 Resource Estimate completed by Arseneau Consulting Services (ACS) in conjunction with JDS Energy and Mining Inc. (JDS).

The resource estimate was calculated based on results from 143 of 154 holes totaling 25,576 metres drilled along the open ended La Cigarra mineralized system which has a drilled strike length of at least three (3) kilometres. The 143 holes included in this initial resource estimate were positioned within a potentially surface minable mineralized area comprised of the San Gregorio and Las Carolinas mineralized zones, which combined form a total strike length of 2.1 kilometres within the known three (3) kilometres. The resource estimate was constrained by a Whittle™ pit shell at an economic cutoff grade of 30 g/t of silver. Highlights of the mineral resource estimate are as follows:

- Measured and Indicated mineral resources of 50,494,000 ounces of silver within 20,755,700 tonnes at an average grade of 76 g/t silver;
- Inferred mineral resource of 3,515,900 ounces silver within 1,780,000 tonnes at an average grade of 61 g/t silver;
- Significant by-products include 40,100 ounces of gold in the measured and indicated categories as well as appreciable lead and zinc values, as provided in mineral resource estimate tables.

Category	Tonnes	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag Oz	Au Oz	Pb Lbs	Zn lbs
Measured	6,235,000	65	0.06	0.10	0.16	13,090,800	12,100	13,161,500	21,706,600
Indicated	14,520,700	80	0.06	0.10	0.14	37,402,800	28,100	32,924,700	45,983,100
<b>M + I</b>	<b>20,755,700</b>	<b>76</b>	<b>0.06</b>	<b>0.10</b>	<b>0.15</b>	<b>50,494,000</b>	<b>40,100</b>	<b>46,086,200</b>	<b>67,689,700</b>
<b>Inferred</b>	<b>1,780,150</b>	<b>61</b>	<b>0.05</b>	<b>0.10</b>	<b>0.12</b>	<b>3,515,900</b>	<b>3,000</b>	<b>3,959,300</b>	<b>4,865,700</b>

*The mineral resource was calculated at cut-off value of 30 g/t silver. It is constrained within a Whittle pit shell and was calculated using metal prices of \$29.20 silver, \$1.00 lead, \$0.95 zinc and parameters that are considered appropriate for potential open pit operations in this location.*

The Company believes that resource expansion is possible as immediate exploration potential exists within and adjacent to the current NI 43-101 resource area (between sections 6+00S in Las Carolinas and 3+50N in San Gregorio) at a 30 g/t silver cut-off as presented in the table below. The potential silver quantity and grade is conceptual in nature as there has been insufficient exploration to define a mineral resource and it is uncertain that further exploration will result in the target being delineated as a mineral resource. This exploration quantity and grade was determined based on a single drill hole within the 100 metre search ellipse.

#### **Immediate Exploration Potential adjacent and within the San Gregorio/Las Carolinas Zones**

Category	Tonnes (000)	Potential In-Situ Grade				Potential Contained Metal
		Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag (oz)
Exploration Potential	3,000 to 4,500	65 to 75	~0.06	0.09 to 0.1	0.13 to 0.14	6,000,000 to 10,000,000

Furthermore, resource exploration potential exists along the open continuous six (6) kilometre long La Cigarra mineralized system. This potential is in part supported by soil sampling along trend of the system, comprising the La Borracha Zone to the north (where nine (9) drill holes have intercepted silver mineralization) and the Las Venadas Zone to the south.

Northair's technical team continues to conduct geological mapping, soil, rock and stream sediment sampling on a number of target locations within the enlarged La Cigarra concession package. An area of particular interest is the southern extension of the mineralized trend south of Las Carolinas, where prospecting and rock sampling has extended the known silver bearing quartz veining and stockwork upwards of three (3) kilometres. This trend includes the Las Venadas Zone, located 500 metres south of Las Carolinas. This target area has returned important silver values over an area of approximately 230 metres by 90 metres, including a rock chip sample returning 2.5 metres of 233.0 g/t silver. In March 2013, Northair reported additional results from the mapping and sampling program, which confirmed the discovery of two other zones located in the southern extension known as La Soledad and Las Chinas.

La Soledad, situated approximately 500 meters south of Las Venadas, contains a number of large mine dumps and historic mine workings that exploited a series of silver bearing quartz veins. Although sampling here reported only moderate silver values, the scope of the historic mine workings are comparable to those found within the Las Carolinas Zone. Much of the area is covered, but soil sampling has defined a broad lead anomaly, supporting the possibility that the mineralized system does underlie the covered area.

Las Chinas is located approximately 1,000 meters south of La Soledad and is comprised of a number of historic mine workings that apparently exploited silver bearing quartz-calcic veins. Northair has thus far mapped and sampled 600 metres of this structure. Sampling yielded relatively low silver values with the exception of three significantly anomalous samples, with a reported high of up to 458 g/t over 0.90 metres. This area is defined by a significant lead-zinc soil anomaly and anomalous gold values. The Company plans further sampling and mapping here with the objective of defining drill targets.

The work done to date in the southern extension of the La Cigarra structure has demonstrated a robust mineralized system with numerous drill targets. The permissive geology and attractive surface sampling results present a compelling opportunity to expand the known resource. The Company is presently prioritizing target areas for a proposed fiscal 2014 drilling program.

Northair is also planning further metallurgical testing to confirm the process flow sheet and metallurgical performance of material from both the San Gregorio and Las Carolinas zones. During the most recent testing, announced in October of 2012, the Company collected samples from the San Gregorio Zone and classified the material into sulphide and oxide material. A flotation and cyanide leaching flow sheet was developed in order to achieve optimum recovery of silver and base metals.

For sulphide material, silver was primarily recovered in a lead flotation concentrate. Initial recoveries of up to 73% of the silver and 70% of the lead were achieved at a primary grind size of 75 microns from material containing 68 g/t silver and 0.15% lead. In a separate test, about 85% of the silver in the lead

cleaner tailings was extracted in a 96-hour carbon-in-leach process after regrinding to 11 microns. Based on these results, there is potential to recover approximately 85% of the total silver from material in a combined flotation-leaching flow sheet. This will be investigated further in future metallurgical programs. Preliminary assessment of the lead concentrate containing 48% lead and 22,600 g/t silver indicates that it would be marketable to smelters.

For oxide material, the silver is more amenable to whole ore leaching than flotation. Approximately 90% of the silver was extracted from material containing 57 g/t silver in 48 hours of whole ore cyanidation at a grind size of 94 microns.

These results indicate that a combined flotation-leaching flow sheet would achieve maximum silver recovery and could apply to both the sulphide and oxide ores.

Grupo Northair, a Mexican subsidiary of Northair, can acquire a 100% ownership in the original six La Cigarra concessions (306 hectares) by making payments totalling US\$445,000 (US\$95,000 paid). The Company also has an agreement to allow access to and drilling on land controlled by a local Ejido.

### ***Sierra Rosario Project, Sinaloa***

In April of 2002, the Company staked the Sierra Rosario concession along the western flanks of the Sierra Madre Occidental geological province, approximately 40 kilometres east of Alamos, Sonora.

Sierra Rosario contains granodiorite rocks overlain by weakly metamorphosed andesites. Intrusive rocks consisting of intermediate porphyry dikes and large intensely altered rhyolite porphyry are exposed at the San Rafael Zone. Northair's exploration staff discovered multiple zones of gold and silver mineralization during their initial exploration programs with some of these zones showing small scale old mine workings.

Northair's field programs concentrated primarily in the San Rafael Zone, located in the northern portion of the property, which contains epithermal silver with gold mineralization having a surface expression of approximately 200 by 70 metres. First phase mapping and sampling by Northair within the San Rafael Zone returned an average of 181 g/t silver and 0.321 g/t gold from 23 chip channel samples.

In 2004 the project was optioned to Sparton Resources Inc. Sparton earned a 51% interest in the project by paying Northair \$130,000 in cash, issuing 275,000 common shares and incurring \$800,000 in exploration expenditures and a joint venture was formed.

The work completed by Sparton was concentrated on the southern portion of the property and involved geological mapping, sampling and electrical and magnetic geophysical surveys as well as detailed soil sampling. Sparton completed an approximate 775 meter diamond drill program in 2006 to test the La Josca Zone. The seven holes tested a 500-metre-long portion of the 1.1-kilometre-long La Josca structure with modest results.

The San Rafael Zone remains the principal target area on the property. Continual work has defined a magnetic anomaly associated with the San Rafael rhyolite porphyry body and also located a similar anomaly which is covered by upper volcanic series tuffs and may represent a new buried intrusion. Both skarn and structurally controlled mineralization containing barite, copper, gold, and silver are present in the area and values of up to 7.28% copper and 13 g/t gold were obtained from samples taken from boulders in a gully below an old mine dump. Base/precious metal mineralization is located in a shear fracture zone east of the main rhyolite intrusive as well as in fault zones associated with rhyolite dykes in limestone on the east side of the property where there is a large multi element soil anomaly.

In 2011, the Company executed an agreement with Sparton Resources Inc. and American Consolidated Metals Corp. ("American Consolidated") to facilitate the acquisition by American Consolidated of Sparton's 50% interest in the Sierra Rosario Property. In consideration for Northair waiving its right of first refusal to match the American Consolidated offer, Sparton transferred a 1% interest and operatorship in the Sierra Rosario Property to Northair concurrently with the completion of the first payment and share issuance from American Consolidated to Sparton under their agreement in respect of the Acquisition announced May 11, 2011.

In February 2012, an extensive exploration program commenced at Sierra Rosario that focused on the San Rafael Zone target and several other silver and gold prospects that have been identified on the Property. Field work included geological mapping, sampling and trenching and a grid was established as part of an induced polarization ("IP") geophysics program. Results of the IP survey identified an open ended northwest-southeast trending chargeability anomaly measuring 1,400 metres in length, extending from line 4+00S (where it is 100 meters wide) to line 18+00S (where it is over 1,300 meters wide). The anomaly remains open to the south and south east. Coincident with the eastern margin of the chargeability anomaly and a northwest-southeast trending ridge, Northair has outlined a silver-gold-arsenic-lead soil anomaly also measuring 1,400 metres in length, extending from line 4+00S to line 18+00S, where the anomaly remains open to the south and south east. Individual soil sample values range up to 326.0 g/t silver; 0.712 g/t gold; 1,320 ppm arsenic and 3,470 ppm lead. The highest silver values occur on line 18+00S, the most southern grid line. Based on positive soil samples and coincident IP anomaly, the geochemical sampling grid has been expanded to the east to establish the ultimate size of the potentially mineralized target.

In May 2012, a core drill program totalling approximately 1,400 metres in six holes commenced on the Property to test a 600 meter length of the coincident induced polarization geophysical and silver/gold geochemical soil anomaly.

In August 2012, Northair reported the results of the drill program. The most significant drill results were obtained in Hole SR-003 where a 7.5 meter interval returned 179.3 g/t silver and 0.287 g/t gold and a 4.9 meter interval assayed 66.7 g/t silver and 0.614 g/t gold. In Hole SR-005, located approximately 400 metres to the southeast of Hole SR-003, a 3.35 meter interval returned 84.1 g/t silver, 0.102 g/t gold and 1.59% lead. The Company also reported that a follow up geochemical program was completed at the Property. This additional work extended 3 existing lines towards the northeast and expanded the grid 600 meters to the southeast. Northair and its joint venture partner are evaluating the results of this program in order to decide if further follow-up work on the property is warranted.

### ***El Reventon Project, Durango***

The El Reventon Project is comprised of approximately 3,400 hectares acquired by staking and a further 60 hectares which is the subject of an option agreement. The Company has acquired a 100% interest in the 60 hectare concession from the optionor by making payments totalling US\$151,000 under an amended agreement.

El Reventon is located in the municipality of Otaez, Durango and is approximately 170 kilometres northwest of the capital city of Durango. The project lies within the Sierra Madre Occidental geological province and a highly prospective mineral belt that includes the mines and districts of Bacis, Montoros, Metates, La Cienega and Topia. The property covers a series of occurrences aligned along a northeast trending belt consisting of low grade metasedimentary rocks overlain by andesite and rhyolite volcanics intruded by numerous dykes and stocks. The property's initial exploration focus has been on the Reventon Breccia which contains silver and base metal mineralization in an intensely altered andesite porphyry.

Within the Reventon Breccia, outcrops of the porphyry display intense hydrothermal brecciation, with micro and macro breccia textures. The entire exposed zone has epithermal silica flooding and replacement within the matrix and breccia fragments. Mineralization occurs as disseminations, veining, stockworking, and aggregates of coarse pyrite, galena and sphalerite, contained within the intrusive as well as the adjacent volcanics. The exposed outcrop of the intrusive and mineralized breccia is an irregular shape with surface dimensions of approximately 70 by 70 metres.

In 2006, a total of 51 samples taken from the breccia averaged 103.9 g/t silver, 0.74% lead and 0.79% zinc. Company geologists believe that the Reventon Breccia could be larger than currently exposed, due to extensive cover by Quaternary deposits and altered post mineral volcanics.

In addition to the Reventon Breccia, the Company has identified other mineral occurrences on the property – the most noteworthy being the Los Alisos, La Estrella and the El Portrero Zones. The Los Alisos Zone occurs approximately 500 metres to the south of the Reventon Breccia. The Los Alisos and Reventon Breccia zones appear to be geologically similar in that they have a comparable geochemical signature and both occur in diorite porphyry. The area between the two zones is covered by post-mineral volcanics and agglomerate; however the Los Alisos Zone may be open to the north and the east.

The La Estrella Zone is a high grade silver-gold polymetallic vein system, located two kilometres southwest of the Reventon Breccia. 24 samples taken from the zone average 0.825 g/t gold and 385 g/t silver over sample widths from .85 to 5 metres. A system of veins and stockworks ranging from approximately 1 to 15 metres in width, has been mapped and sampled in old underground workings and limited surface outcrop over a defined strike length of approximately 180 metres. The zone remains open in both strike directions. Geologic mapping indicates that La Estrella sits in a north westerly striking belt of mineralization that contains numerous old workings and occurs over a distance of 2.3 kilometres.

The third zone, the El Portrero Zone is located approximately one kilometre northeast of the Reventon Breccia, and contains dozens of prospects and small mine workings over an area of approximately 150 by 225 metres. The zone is postulated as a potential bulk mineable silver target with vein, stockwork and disseminated mineralization occurring in silicified diorite porphyry. A total of 61 samples taken from the zone average 23 g/t silver over widths ranging from 1.5 to 7 metres. The Portrero East Zone lies about 200 metres to the east of the main Portrero Zone, and contains high-level epithermal quartz stockwork and silica replacement in diorite porphyry exposed over an area of approximately 75 by 115 metres. Ten panel samples from this zone average 28 g/t silver.

In the fall of 2007, the Company completed a successful initial core drill test of the Reventon Breccia that totalled 660 metres in six NQ holes, in which all holes intercepted significant zones of mineralized breccia. Results for the drill program included 33.5 metres of 179 g/t silver, 22.8 metres of 94.7 g/t silver and 56.4 metres g/t silver, with associated lead and zinc values.

In March 2008, the Company conducted a second phase reverse circulation drill program totalling 2,170 metres in 17 holes at the Reventon Breccia and Los Alisos Zone. The program was successful in increasing the size of the Reventon Breccia with highlights including 91.4 metres of 87 g/t silver containing an intercept of 19.8 metres of 176.4 g/t silver; and 80.8 metres of 71.9 g/t silver containing an intercept of 7.6 metres of 234.5 g/t silver.

During fiscal 2013, the Company entered into an agreement whereby it has granted Focus Ventures Ltd. (“Focus”) the option to acquire a 65% interest in the it’s El Reventon Silver Project. Under the terms of the agreement, Focus can earn its interest by the payment of US\$235,000 (\$10,000 received) to the Company over 24 months and incurring US\$2,000,000 of exploration expenditures on the property over a three year period.

During the first part of 2012, work carried out by Focus concentrated on the La Estrella Zone, where a total of 62 samples, taken from old underground workings along a 400 kilometre strike, have returned significant grades in silver and associated gold, lead and zinc values. Focus has commenced a detailed soil survey over a 6 x 8 kilometre grid at El Reventon to geochemically map and better define targets such as the Estrella Zone, and generate new targets for follow-up exploration.

In October 2012, Focus reported that a 930-sample grid-based soil survey undertaken over El Reventon identified multiple silver targets. The largest of the targets is a >10 g/t silver-in-soil anomaly over 1,300 x 500metres located in the southern part of the claims, approximately 2 kilometres southwest of the drilled Reventon Breccia. The coincident gold and silver anomaly is accompanied by strongly anomalous lead, zinc, arsenic and antimony values. A number of soil samples returned fire assay results over 100 g/t silver, to a maximum of 384 g/t silver and 0.59 g/t gold. Samples were taken at 40m sample spacing on lines 200m apart. Additional follow up exploration on this zone as well as other newly discovered zones will continue to be carried out by Focus.

In May 2013, Focus reported to Northair that it had commenced a program totalling 2,000 metres of core drilling to test a number of targets. Drilling will concentrate in the Estrella mine area, where at least five mineralized breccias and veins have been discovered over an area of approximately 700 metres long x 250 metres wide. Focus also plans to carry-out additional drilling at the Reventon Breccia, where drilling in 2007 and 2008 by Northair returned significant intercepts of silver, zinc and lead within the majority of the completed holes. The results of the drill program have yet to be reported.

## **FINANCIAL CONDITION, LIQUIDITY, CAPITAL RESOURCES, OPERATIONS AND FINANCIAL RESULTS**

### **OVERALL PERFORMANCE**

During the year ended February 28, 2013, the Company's exploration programs enabled it to raise net proceeds of \$5,976,542 from share issuances, resulting in continued exploration work and ongoing operations in Mexico. Subsequent to February 28, 2013, the Company has continued its' work and has released a NI 43-101 technical report, including a resource estimate, on the La Cigarra property.

At February 28, 2013, the Company's financial position was as follows:

	<u>February 28, 2013</u>	<u>February 29, 2012</u>
<b>Current assets</b>	<b>\$ 2,921,307</b>	\$ 4,132,267
<b>Non-current assets</b>	<b>10,507,761</b>	4,808,575
<b>Liabilities</b>	<b>(728,022)</b>	(508,409)
	<hr/>	<hr/>
<b>Shareholders' equity</b>	<b>\$ 12,701,046</b>	\$ 8,432,433

### **Financing/Use of Proceeds**

During the year ended February 28, 2013 the Company completed a private placement for gross proceeds of \$6,099,616, providing funds for exploration and working capital and increasing its shareholder equity.

## SELECTED ANNUAL INFORMATION

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Net sales and total revenue	\$ -	\$ -	\$ -
Net loss for the year	<b>(2,379,394)</b>	(2,049,849)	(485,829)
Net loss per share	<b>(0.03)</b>	(0.03)	(0.01)
Total assets	<b>13,429,068</b>	8,940,842	2,937,602
Total long-term liabilities	\$ -	\$ -	\$ -
Dividends declared per share	\$ -	\$ -	\$ -

## RESULTS OF OPERATIONS

The Company's net loss for the year ended February 28, 2013 was \$2,379,394 or \$0.03 per share compared with a net loss of \$2,049,849 or \$0.03 per share for the comparative period ended February 29, 2012. The primary reasons for the increased loss for fiscal 2013 was the increased activity level of the Company as it continued its exploration program in Mexico.

During fiscal 2013, general and administrative expenses were \$2,099,024 (2012-\$1,901,098) an increase of \$197,926 from the prior year. The loss for the year was largely attributable to: share-based payments \$620,244 (2012- \$1,150,901), increased shareholder communication and investor relation costs \$435,245 (2012- \$191,305), professional fees \$260,482 (2012-\$75,900) and increased office, salaries and general expenses \$730,732 (2012- \$499,345). The increases in shareholder communication, office and consulting fees was a result of increased activities undertaken by the Company as it administered the advancement of its Mexico operations.

Exploration costs written-off during the current year totaled \$160,898 compared with \$60,699 in the comparative year. The increase in the amounts written off was a result of general activities undertaken by the Company in the review of opportunities near the La Cigarra property.

During the year, as a result of delays in recovering prior years' value added taxes the Company has written-down the amount receivable, resulting in a provision of \$195,438 (2012- \$195,438) being charged to operations in 2013.

During the current year, the Company realized interest and other income of \$78,919 compared to \$97,517 in the comparative year. The reductions in other income was largely due to reduced recoveries of amounts that had been written off in prior years.

The Company's business consists of mineral exploration and development and is focused on the advancement of its Mexican properties. At February 28, 2013 the Company's expenditures on exploration and evaluation assets consisted of the following:

	<b>Parral 1, Mexico</b>	<b>La Cigarra, Mexico</b>	<b>El Reventon, Mexico</b>	<b>Sierra Rosario and Other</b>	<b>Total</b>
February 28, 2011	\$ -	\$758,322	\$894,252	\$ -	\$1,652,574

### *La Cigarra, Mexico*

During fiscal 2010, the Company entered into an option agreement, through its wholly owned subsidiary Grupo Northair to acquire a 100% interest in the La Cigarra Project located in the State of Chihuahua, Mexico.

Grupo Northair can acquire a 100% ownership in the concessions by making payments over a five year period totalling US\$445,000 (US\$95,000 paid). The Company also has an agreement to allow drilling to be conducted on land controlled by a local Ejido. During fiscal 2012, the Company expanded the project to include the La Borracha concession at a cost of US\$35,000.

### *Parral 1, Mexico*

During the year ended February 28, 2013, the Company signed an agreement with DFX Exploration Ltd. to further enlarge its land position by acquiring the rights to the Parral One Concession, which surrounds the 6 core concessions. Northair can earn 70% of a 4,080.8 hectare position of the surrounding concessions and 50% of the remaining 18,220.2 hectares. Under the terms of the agreement the Company can acquire its interest by the payment of US\$525,000 (\$100,000 paid), the issuance of 1,500,000 shares of the Company (200,000 issued with a fair value of \$54,000) and the spending of US\$2,000,000 in exploration over a four year period. In addition, the Company has agreed to subscribe for 1,000,000 common shares in the vending company at a price of \$0.25 per share. As at February 28, 2013, the Company had subscribed for 400,000 shares at a value of \$100,000 and has recorded the share purchase as an acquisition cost.

The Company also reached an agreement to acquire surface rights to land adjoining and overlying the La Cigarra Project at a cost of US\$825,000 (US\$350,000 paid) with the remaining US \$475,000 accrued as due to property vendors. In addition, a US\$200,000 amount will be payable should the Company

announce development of a mine on the La Cigarra Project. These rights are capitalized to property and equipment.

### ***El Reventon, Mexico***

The El Reventon project in Durango, Mexico was acquired by staking a 100% interest in certain claims and by entering into, in July 2006, an option agreement for an additional concession. Under the terms of the option agreement, the Company would earn a 100% interest in the optioned concession by making payments totalling US\$151,000 (paid) over a seventy-seven month period expiring no later than December 27, 2012.

During the year ended February 28, 2013, the Company entered into an agreement whereby it has granted Focus Ventures Ltd. (“Focus”) the option to acquire a 65% interest in its El Reventon Silver Project located in the state of Durango, Mexico. Under the terms of the agreement, Focus can earn its interest by the payment of US\$235,000 (US\$10,000 received) to the Company over 24 months, incurring US\$2,000,000 of exploration expenditures on the property over a three year period and the maintenance of the underlying option agreement and costs. Focus can earn an additional 15% by preparing a feasibility study and the payment of \$100,000 to the Company.

### ***Sierra Rosario, Mexico***

During the year ended February 29, 2012, the Company executed an agreement with Sparton Resources Inc. (“Sparton”) and American Consolidated Metals Corp. (“American Consolidated”) to facilitate the acquisition by American Consolidated of Sparton’s 50% interest in the Sierra Rosario Property located in the state of Sinaloa, Mexico. Sparton held a 51% interest in Sierra Rosario under a Joint Venture Agreement with Northair. In consideration for Northair waving its right of first refusal to match the American Consolidated offer, Sparton transferred a 1% interest and operatorship in the Sierra Rosario Property to Northair concurrently with the completion of the first payment and share issuance from American Consolidated to Sparton under their agreement.

During the year ended February 28, 2013, the Company received \$174,703 in joint venture cash recoveries for exploration expenditures and reduced the liability by \$103,443 as a result of expenditures.

### ***Brandywine, Canada***

The Company maintains the Brandywine claim near Whistler, B.C. The nine unit claim is in good standing until August 3, 2015.

## **SUMMARY OF QUARTERLY RESULTS**

The following table sets out selected unaudited quarterly financial information of Northair and is derived from unaudited quarterly financial statements prepared by management.

<u>Quarter Ended</u>	<u>Revenues</u>	<u>Net Income (Loss)</u>	<u>Basic Earnings (Loss) per share</u>
February 28, 2013	\$ Nil	\$(808,586)	\$(0.01)
November 30, 2012	\$ Nil	\$(479,366)	\$(0.01)
August 31, 2012	\$ Nil	\$(732,000)	\$(0.01)
May 31, 2012	\$ Nil	\$(359,442)	\$(0.01)
February 28, 2012	\$ Nil	\$(545,650)	\$(0.01)
November 30, 2011	\$ Nil	\$(344,382)	\$(0.00)
August 31, 2011	\$ Nil	\$(503,454)	\$(0.01)
May 31, 2011	\$ Nil	\$(656,363)	\$(0.01)

The Company's quarterly results can be affected by many factors such as seasonal fluctuations, variations in capital markets, the write-off of capitalized amounts, stock-based compensation costs, tax recoveries/costs and legal matters.

The Company's exploration activities in Mexico can be seasonal, with less work conducted in Mexico during certain summer months due to the rainy season. During fiscal 2013, the Company has been active in exploring in Mexico and the exploration and other expenditures for the year reflect this activity.

In addition, the Company's quarterly results from operations are also affected by the market for securities. The Company's primary source of funding is through the issuance of share capital. When the capital markets are depressed, the Company's activity level normally declines accordingly. As capital markets strengthen and the Company is able to secure equity financing with favorable terms, the Company's activity levels and the size and scope of planned exploration projects will also increase. Stronger capital markets allowed the Company to realize gains from the sale of investments. These gains help to offset the Company's administrative expenses, and contribute to an overall reduction in the Company's reported quarterly and annual losses.

## **LIQUIDITY**

At February 28, 2013 the Company had working capital of \$2,193,285 compared with \$3,623,858 at February 29, 2012. The 2013 working capital position included cash and short-term deposits of \$2,703,347 compared with \$3,868,034 at February 29, 2012. The reduced working capital position was a result of increased expenditures on exploration activities in 2013.

During the year ended February 28, 2013, the Company used \$1,776,158 (2012 - \$1,057,038) of cash in operating activities after adjusting for changes in non-cash items such as amortization of \$29,325 (2012 - \$15,592), share-based payments \$620,244 (2012 - \$1,150,901), write-downs of \$356,336 (2012 - \$256,137) and other items requiring cash totaling \$402,669 (2012 - \$413,829).

Investing activities used \$5,365,071 (2012 - \$2,738,914) during the year ended February 28, 2013. The Company used \$399,372 (2012 - \$59,180) to purchase property and equipment, \$4,965,699 (2012 - \$2,783,177) for work on its exploration and evaluation assets, reduced by \$nil (2012 - \$103,443) the amount due to the joint-venture partner at the end of the year. The funds for exploration and evaluation assets were used to advance the work on the La Cigarra and Sierra Rosario properties and for general exploration activity in Mexico.

Financing activities provided \$6,941,542 (2012 - \$3,257,117) during the year ended February 28, 2013, consisting of \$5,976,542 (2012 - \$6,615,377) from the net proceeds of shares issued and stock options and shares purchase warrants exercised increased by the amount of \$965,000 (2012 - reduced by \$3,358,260 invested) redeemed from short-term deposits.

## **Risks and Uncertainties**

### *Industry*

An investment in natural resource companies involves a significant degree of risk. The degree of risk increases substantially where the Company's properties are in the exploration as opposed to the development stage. Investment in the securities of the Company should be considered as highly speculative due to the nature of the Company's business. The following additional risk factors should be given special consideration.

### *Exploration, Development and Mining Risks*

Exploring and developing mineral resource projects bears a high potential for all manner of risks. Additionally, few exploration projects successfully achieve development due to factors that cannot be predicted or foreseen. Moreover, even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed. Mineral exploration involves many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of base/precious metals, any of which could result in work stoppages, damage to property, and possible environmental damage. If any of the Company's exploration programs are successful, there is a degree of uncertainty attributable to the calculation of ore resources and corresponding grades being mined or dedicated to future production. Until ore is actually mined and processed, quantity of reserves and grade must be considered as estimates only. In addition, the quantity of reserves may vary depending on metal prices. Any material change in quantity of reserves, grade or recovery ratio, may affect the economic viability of the Company's properties. In addition, there can be no assurance that metal reserves in small-scale laboratory tests will be duplicated in larger scale tests under on-site conditions or during production. The Company closely monitors its activities and those factors, which could impact them, and employs experienced consulting, engineering, and legal advisors to assist in its risk management reviews.

The Company's properties are currently being assessed for exploration and as a result, the Company has no source of operating cash flow. Failure to obtain additional financing could result in a delay or indefinite postponement of further exploration. Development of the Company's mineral properties will only follow upon obtaining satisfactory exploration results. Mineral exploration and development involves a high degree of risk and few properties that are explored are ultimately developed into producing mines. There is no assurance that the Company's mineral exploration and development activities will result in any discoveries of bodies of ore. The long-term profitability of the Company's operations will be in part directly related to the cost and success of its exploration programs, which may be affected by a number of factors. Substantial expenditures are required to establish reserves through drilling, to develop metallurgical processes to extract the metal from the resources and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that the funds required for development can be obtained on a timely basis.

### *Foreign Operation Risks*

The Company's operations are affected in varying degrees by Mexican government regulations (both state and federal), including those with respect to restrictions on foreign investment, production, price controls, export controls, income taxes, and expropriation of property, employment, land use, water use, environmental legislation and mine safety. The regulatory environment is frequently in a state of change and new laws, regulations and requirements may be retroactive in their effect and implementation.

Northair's operations may also be affected in varying degrees by political and economic instability, economic and other sanctions imposed by other nations on Canada or Mexico, terrorism, military repression, crime, extreme fluctuations in currency exchange rates and high inflation.

To mitigate some of these factors, the Company maintains its head office in Vancouver, Canada. With the exception of short term operational requirements for Grupo Northair, funds are maintained and controlled in Vancouver, both in Canadian and U.S. dollars. The Company hires consultants as necessary to provide geological and other services. Overhead costs in Mexico compare favorably with Canada and the political and economic climate is considered by the Company to be stable.

### *Insurance*

The Company's involvement in the exploration for mineral properties may result in the Company becoming subject to liability for pollution, property damage, personal injury or other hazards. Although the Company has insurance to address many risks, such insurance has limitations on liability that may not be sufficient to cover the full extent of such liabilities. In addition, such risks may not, in all circumstances be insurable or, in certain circumstances, the Company may elect not to obtain insurance to deal with specific risks due to the high premiums associated with such insurance or other reasons. The payment of such uninsured liabilities would reduce the funds available to the Company. The occurrence of a significant event that the Company is not fully insured against, or the insolvency of the insurer of such event, could have a material adverse effect on the Company's financial position, results of operations or prospects.

### *Environmental Risks*

All phases of the mineral exploration and development business present environmental risks and hazards and are subject to environmental legislation. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances used and or produced in association mining exploration and mining operations. The legislation also requires that facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. The discharge of pollutants into the air, soil or water may give rise to liabilities to foreign governments and third parties and may require the Company to incur costs to remedy such discharge. No assurance can be given that the application of environmental laws to the business and operations of the Company will not result in a curtailment of production or a material increase in the costs of production, development or exploration activities or otherwise adversely affect the Company's financial condition, results of operations or prospects.

The current or future operations of the Company, including development activities and commencement of production on its properties require permits from the applicable governmental authorities and such operations are and will be governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. Companies engaged in the development or operation of mines and related facilities generally experience increased costs, and delays in production and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance, however, that all permits which the Company may require for construction of mining facilities and conduct of mining operations will be obtainable on reasonable terms or that such laws and regulations would not have an adverse effect on any mining project which the Company might undertake. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing

operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations. Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduced levels of production at producing properties or require abandonment or delays in development of new mining properties.

#### *Prices, Markets and Marketing of Base/Precious Metals*

The Company's revenues, if any, are expected to be in large part derived from the mining and sale of base/precious metals or interests related thereto. The price of those commodities has fluctuated widely, particularly in recent years, and is affected by numerous factors beyond the Company's control including international economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates, global or regional consumptive patterns, speculative activities and increased production due to new mine developments and improved mining and production methods. The effect of these factors on the price of base/precious metals, and therefore the economic viability of any of the Company's exploration projects, cannot accurately be predicted.

The marketability of any minerals acquired or discovered may be affected by numerous factors which are beyond the control of the Company and which cannot be accurately predicted, such as the proximity and capacity of milling facilities, mineral markets and processing equipment and governmental regulations including regulations relating to royalties, allowable production and importing and exporting of minerals.

#### *Substantial Capital Requirements; Liquidity*

The Company anticipates that it will make substantial capital expenditures for the acquisition, exploration, development and production of its mineral properties in the future. The Company currently has no revenue and may have limited ability to expend the capital necessary to undertake or complete future drilling programs. There can be no assurance that debt or equity financing, or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt equity financing is available, that it will be on terms acceptable to the Company. Moreover, future activities may require the Company to alter its capitalization significantly. The inability of the Company to access sufficient capital for its operations could have a material adverse effect on the Company's financial condition, results of operations or prospects.

#### *Loss of Key Management*

During the year the Company continued to retain Mr. David Mehner as Senior Consulting Geologist to oversee its exploration program and to acquire further projects for Northair and assist in the development of its existing properties. Mr. Mehner has over 30 years experience throughout Mexico, North America and Asia, and provides valuable direction to Northair as it moves forward. Fred G. Hewett, President and Chief Executive Officer, devotes 75% of his time to the Company's affairs. The loss of the services of any of its management could have a material adverse effect on the Company. To date, the Company has not engaged in succession planning.

## **COMMITMENTS**

As at February 28, 2013, the commitment for rental of the Company's office space is as follows:

<u>Year ending</u>	<u>Amount</u>
February 28, 2014	\$ 269,771
February 28, 2015	\$ 269,771
February 29, 2016	\$ 247,290

These amounts include the basic monthly rent, as well as the Company's proportionate share of the building's operating costs and property taxes. The Company has sub-lease agreements which allow it to recover a portion of the minimum annual rental commitments.

## **CAPITAL RESOURCES**

The Company has no operations that generate cash flow and its long-term financial success is dependent on management's ability to discover and develop economically viable mineral deposits. Exploration is a lengthy process that can take many years and is subject to factors that are beyond the Company's control.

In order to finance the Company's exploration programs and to cover administrative and overhead expenses, the Company raises money through equity sales, from the exercise of convertible securities and, in the past, from the sale of investments. Although the Company has had past success in obtaining financing, there can be no such assurance that it will be able to obtain adequate financing in the future or that the terms of any financing will be favourable. Many factors influence the Company's ability to raise funds, including the state of the resource market and commodities prices, the climate for mineral exploration, the Company's track record and the experience and caliber of its management.

Actual funding requirements may vary from those planned due to a number of factors, including the progress of exploration activity and foreign exchange fluctuations. The Company intends to continue to use various strategies to minimize its dependence on equity capital, including the securing of joint venture partners where appropriate.

## **TRANSACTIONS WITH RELATED PARTIES**

Balances and transactions between the Company and its subsidiary have been eliminated on consolidation and accordingly, are not disclosed below. Details of the transactions between the Company and other related parties are disclosed below.

### a) *Related party transactions*

Certain companies which have an officer and/or director or former officer and/or director in common or which have a partner who is an officer of the Company render services or are charged for certain services as follows:

<u></u>	<u>Nature of transactions</u>
Avisar Chartered Accountants	Accounting fees
New Dimension Resources Ltd.	Administrative and salary recoveries
Mercator Minerals Ltd. (formerly Creston Moly Corp.)	Administrative recoveries
Capstone Mining Corp.	Administrative recoveries
North Arrow Minerals Inc.	Administrative recoveries
Troon Ventures Ltd.	Administrative recoveries

The Company incurred the following transactions in the normal course of operations in connection with companies which have an officer and/or director or former officer in common or with a company in which an officer of the Company is a partner.

		<b>Year ended February 28, 2013</b>		Year ended February 29, 2012
Accounting fees	\$	<b>139</b>	\$	22,663
Administrative recoveries	\$	<b>(38,421)</b>	\$	(66,056)
Salary recoveries	(i) \$	<b>(187,194)</b>	\$	(426,500)
Consulting	\$	<b>181,293</b>	\$	-

(i) The Company recovered salaries from companies with certain officers and directors in common. These amounts have been recorded against office, salaries and general expense.

b) *Related party balances*

The Company is owed the following amounts from related parties primarily for reimbursements of shared office costs:

		<b>February 28, 2013</b>		February 29, 2012
Mercator Minerals Ltd.	\$	<b>4,268</b>	\$	20,628
New Dimension Resources Ltd.		<b>8,731</b>		35,322
Troon Ventures Ltd.		<b>144</b>		(4,773)
North Arrow Minerals Inc.		<b>50,138</b>		3,020
Stornoway Diamonds Corp.		<b>-</b>		2,985
Other		<b>42,569</b>		33,459
	\$	<b>105,850</b>	\$	90,641

c) *Compensation of key management personnel*

		<b>Year ended February 28, 2013</b>		Year ended February 29, 2012
Management fees, directors' fees, salaries		<b>\$ 314,333</b>		\$ 235,696
Share-based payments		<b>\$ 378,009</b>		\$ 733,685

- Share-based payments represent the expense for the years ended February 28, 2013 and February 29, 2012.  
- Key management personnel were not paid post-employment benefits, termination benefits, or other long-term benefits during the years ended February 28, 2013 and February 29, 2012.

d) *Employment contract*

During the year ended February 28, 2013, the Company entered into employment agreements with certain senior employees and officers requiring minimum annual payments totalling \$495,500. In addition, certain of the agreements contain clauses which could provide for payments to be made to these employees or officers upon the conclusion of a change of control or similar transaction. In the

event of such a transaction the Company could become liable for the payment of \$875,500 before January 1, 2014 and \$1,181,000 thereafter.

#### FOURTH QUARTER

During the fourth quarter, the Company incurred a net loss of \$808,586 or \$0.01 per share compared to a net loss of \$545,650 or \$0.01 per share for the comparative quarter of the prior year. The increased loss was largely due to increased office, salaries and general expenses, a provision for the write-down of value added taxes in Mexico and the write-off of exploration and evaluation assets. As a result of continued delays in the collection of taxes from the Mexican authorities, value added taxes are classified as long-term receivables and provision has been taken to reflect a \$195,438 (2012-\$195,438) write-down in the year end accounts.

Cash used in operating activities during the fourth quarter increased to \$1,776,158 from \$1,057,038 as a result of increased operating costs as previously disclosed.

Cash used in investing activities increased to \$5,365,071 from \$2,738,914 as a result of equipment and property purchases and increased work on the Company's La Cigarra property.

During the fourth quarter draw-downs of the Company's short-term funds on deposit and the exercise of stock options generated an additional \$1,415,599 for financing the Company's activities from the Company's previous quarter.

#### OUTSTANDING SHARE DATA

The table below presents the Company's common share data as of June 21, 2013.

	Price	Expiry date	Number of common shares
Common shares, issued and outstanding			91,738,313
Securities convertible into common shares			
Warrants	\$0.40	December 28, 2013	11,239,372
Options	\$0.15	February 9, 2014	280,000
	\$0.15	October 30, 2014	15,000
	\$0.15	March 11, 2015	150,000
	\$0.15	April 21, 2015	150,000
	\$0.71	May 19, 2016	1,150,000
	\$0.495	July 18, 2016	750,000
	\$0.305	September 20, 2016	50,000
	\$0.25	September 28, 2016	175,000
	\$0.24	December 15, 2016	280,000
	\$0.28	June 13, 2017	2,765,000
	\$0.29	January 10, 2018	530,000
	\$0.40	December 28, 2013	625,000
	\$0.22	March 4, 2018	2,805,000
			<b>112,702,685</b>

### *Shareholder Rights Plan*

During the year the Company's board of directors approved the adoption of a Shareholder Rights Plan (the "Rights Plan") that the shareholder approved at the Company's annual general meeting of shareholders held on August 16, 2011. The Rights Plan has an initial term which expires at the annual general meeting of shareholders of the Company to be held in 2014, unless terminated earlier. The Rights Plan may be extended beyond 2014 by resolution of shareholders at such meeting. Under the terms of the Rights Plan, should a transaction or event occur, holders will be entitled to acquire common shares at a 50% discount to the market price. Certain persons or groups may be exempt from the dilutive effects of the Rights Plan. The Rights Plan has received the approval of the TSX Venture Exchange.

### *Shares Issued*

- a) During the year ended February 28, 2013, the Company completed a 21,784,344 unit non-brokered private placement at a price of \$0.28 per unit for gross proceeds of \$6,099,616. Each unit consisted of one share and one half share purchase warrant. Each full warrant shall enable the holder to purchase a share in the Company at a price of \$0.40 for a period of eighteen months. The warrants are subject to an accelerated exercise provision if the shares of the Company trade at or above \$0.85 for 10 or more consecutive days. Finders' fees consisting of \$117,216 and 347,200 Finders' Warrants were payable on a portion of the financings. The Finders' Warrants have the same terms and conditions as the warrants forming the units of the financings and were valued at \$53,285 based on the Black Scholes model using the following assumptions:

Risk-free interest rate	0.99%
Expected dividend yield	Nil
Expected stock price volatility	142%
Expected life (in years)	1.5

The Company also paid \$31,058 in share issuance costs associated with the private placement.

- b) During the year ended February 29, 2012, the Company completed a private placement by issuing 17,126,666 units at a price of \$0.30 per unit for total proceeds of \$5,138,000. Each unit is comprised of one common share and one half share purchase warrant, with each warrant entitling the holder to acquire a further common share at a price of \$0.50 per share for 12 months. A total of 834,833 finders' fee warrants were issued in conjunction with this private placement having the same characteristics as the warrants issued in the private placement. The finders' fee warrants have been valued at \$119,381. The finders' fee warrants were valued based upon the Black Scholes model utilizing the following assumptions:

Risk-free interest rate	1.69%
Expected dividend yield	Nil
Expected stock price volatility	159%
Expected life (in years)	0.76

The Company also paid \$277,493 in share issuance costs associated with the private placement.

### *Stock options*

The Company has established a share purchase option plan whereby the board of directors may, from time to time, grant up to a total of 13,839,793 options to directors, officers, employees or

consultants. The vesting period of options outstanding range from the grant date to one year and expire 5 years from the grant date.

a) Movements in share options during the year

The changes in share options during the year ended February 28, 2013 and the year ended February 29, 2012 were as follows:

	Options outstanding	Weighted Average exercise price
Balance, February 28, 2011	1,455,000	\$0.19
Granted	2,660,000	\$0.56
Exercised	(360,000)	\$0.17
Forfeited/Expired	(515,000)	\$0.49
Balance, February 29, 2012	3,240,000	\$0.45
Granted	3,920,000	\$0.30
Exercised	(120,000)	\$0.21
Forfeited/Expired	(40,000)	\$0.24
<b>Balance, February 28, 2013</b>	<b>7,000,000</b>	<b>\$0.37</b>

b) Fair value of share options granted

During the year ended February 28, 2013, the Company granted options to directors, officers and employees to purchase up to 3,920,000 common shares of the Company at a weighted average exercise price of \$0.30 per share. The estimated fair value of the stock options granted during the year ended February 28, 2013 was \$648,410 using the Black Scholes option pricing model.

During the year ended February 29, 2012, the Company granted options to employees to purchase up to 2,660,000 common shares of the Company at a weighted average exercise price of \$0.56 per share. The estimated fair value of the stock options granted during the year ended February 29, 2012 was \$1,260,241 using the Black Scholes option pricing model.

The Company has used the following assumptions in its option pricing model:

	<b>Year ended February 28, 2013</b>	Year ended February 29, 2012
Risk-free interest rate	<b>0.99%</b>	0.99% - 2.34%
Expected dividend yield	<b>Nil</b>	Nil
Expected stock price volatility	<b>86% - 130%</b>	112% - 234%
Expected life (in years)	<b>1.0 - 3.0</b>	3.0 - 3.5
Expected forfeiture rate	<b>7%</b>	0%

During the year ended February 28, 2013 a total value of \$620,244 (2012 - \$1,150,901) has been recorded to reserves and to share-based payments. The portion of share-based payments recorded is based on the vesting schedule of the options.

## Warrants

### a) Movements in warrants during the year

The changes in share warrants during the year ended February 28, 2013 and the year ended February 29, 2012 were as follows:

	Warrants outstanding	Weighted average exercise price
Balance –February 28, 2011	8,471,350	\$0.20
Issued	9,398,166	\$0.50
Exercised	(8,471,350)	\$0.20
Balance, February 29, 2012	9,398,166	\$0.50
Issued	11,239,372	\$0.40
Exercised/Expired	(9,398,166)	\$0.50
<b>Balance February 28, 2013</b>	<b>11,239,372</b>	<b>\$0.40</b>

### b) Warrants outstanding

A summary of the Company's warrants outstanding as at February 28, 2013 is as follows:

Number	Exercise price	Expiry Date
11,239,372	\$0.40	December 28, 2013

## CHANGES IN ACCOUNTING POLICIES AND CRITICAL ACCOUNTING ESTIMATES

### Nature of Business

International Northair Mines Ltd. (the "Company") is incorporated under the laws of the Province of British Columbia, Canada. The Company's corporate office, registered address and records office is located at 625 Howe Street, Suite 860, Vancouver, British Columbia V6C 2T6.

The Company's consolidated financial statements are presented in Canadian dollars, which is the functional currency of the Company and of its Mexican subsidiary, Grupo Northair de Mexico, S.A. de C.V. ("Grupo Northair"). The Company trades its shares on the TSX Venture Exchange.

The Company is an exploration stage company which is engaged principally in the acquisition and exploration of mineral properties. These financial statements have been prepared on the assumption that the Company is a going concern, meaning that it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the normal course of operations. The Company has incurred a deficit of \$27,135,484 at February 28, 2013 and has no current source of revenue. During fiscal 2013 the Company raised capital to meet its working capital requirements for fiscal 2013 and part of 2014. The Company's continuation as a going concern is dependent on its ability to attain profitable operations and generate funds therefrom and/or raise funds sufficient to meet current and future obligations. There can be no assurances that management's future plans for the Company will be successful. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern. These financial statements do not include any adjustments to the recoverability and classification of assets and liabilities that might be necessary, should the Company be unable to continue as a going concern.

## **Statement of Compliance and Conversion to International Financial Reporting Standards**

The consolidated financial statements of the Company, including comparatives, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). The financial statements are presented in Canadian dollars unless otherwise noted.

### **Basis of Consolidation**

The consolidated financial statements of International Northair Mines Ltd. include the accounts of the Company and its wholly-owned subsidiary Grupo Northair. All intercompany balances and transactions have been eliminated.

### **New Accounting Pronouncements**

The Company has not as yet adopted the following revised standards that are not yet effective, and is currently assessing the impact that these standards will have on the financial statements.

- i. IFRS 9: Financial Instruments to replace IAS 39: Financial Instruments: Recognition and Measurement.
- ii. IFRS 10: Consolidated Financial Statements builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The standard provides additional guidance to assist in the determination of control where this is difficult to assess. IFRS 10 supersedes IAS 27: Consolidated and Separate Financial Statements and SIC-12 Consolidation - Special Purpose Entities.
- iii. IFRS 11: Joint Arrangements is intended to provide for a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form (as is currently the case). The standard addresses inconsistencies in the reporting of joint arrangements by requiring a single method to account for interests in jointly controlled entities. IFRS 11 supersedes IAS 31, Interests in Joint Ventures and SIC 13, Jointly Controlled Entities Non-monetary Contributions by Venturers.
- iv. IFRS 12: Disclosure of Interests in Other Entities combines, enhances and replaces the disclosure requirements for subsidiaries, joint arrangements, associates and unconsolidated structured entities.
- v. IFRS 13: Fair Value Measurement defines fair value, sets out in a single IFRS framework for measuring fair value, and requires disclosures about fair value measurements.
- vi. IAS 1: Presentation of Financial Statements require an entity to group items presented in the statement of other comprehensive income on the basis of whether they may be reclassified to profit or loss subsequent to initial recognition. For those items presented before tax, the amendments to IAS 1 also require that the tax related to the two separate groups be presented separately. The amendments to IAS 1 are effective for annual periods beginning on or after July 1, 2012, with earlier application permitted.
- vii. IAS 27 Separate Financial Statements (as amended in 2011) contains accounting and disclosure requirements for investments in subsidiaries, joint ventures, and associates when

an entity prepares separate financial statements. The standard requires an entity preparing separate financial statements to account for those investments at cost or in accordance with IFRS 9 Financial Instruments. In completing IFRS 10, the IASB removed from IAS 27 all requirements relating to consolidated financial statements.

viii. IAS 28 Investments in Associates and Joint Ventures (as amended in 2011) prescribes the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

The Company is currently assessing the impact that these new accounting standards will have on the financial statements.

### **Significant accounting estimates and judgments**

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, profit and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Significant assumptions and estimates relate to, but are not limited to, the following:

- The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position;
- Environmental rehabilitation is calculated using available market factors;
- The inputs used in accounting for share-based payment expense which is included in the statement of comprehensive loss. These estimates are derived using the Black-Sholes option pricing model or are based on the value of comparable goods and services. Inputs are determined using readily available market data.
- The recognition of deferred tax assets is determined on whether it is more probable than not that these assets will be recovered.
- The determination of the Company's subsidiary's functional currency.

### **SUBSEQUENT EVENTS/PROPOSED TRANSACTIONS**

Subsequent to February 28, 2013:

- a) The Company granted employees, directors and consultants options entitling them to purchase 2,805,000 shares in the Company at a price of \$0.22 per share for a period of five years.

## FINANCIAL INSTRUMENTS

### *Categories of financial instruments*

	February 28, 2013	February 29, 2012
<b>Financial assets</b>		
FVTPL Assets		
Cash	\$ 166,347	\$ 366,034
Short-term deposits	2,537,000	3,502,000
AFS Assets		
Short-term investments	1,516	4,295
Loans and receivables		
Receivables	67,975	108,246
Due from related parties	105,850	90,641
Taxes receivable	478,333	195,438
	<u>\$ 3,357,021</u>	<u>\$ 4,266,654</u>
<b>Financial liabilities</b>		
Other financial liabilities		
Accounts payable and accrued liabilities	\$ 240,722	\$ 404,966
Due to property vendors	487,300	-
Due to joint venture	-	103,443
	<u>\$ 728,022</u>	<u>\$ 508,409</u>

### *Fair value of financial instruments*

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The Company's classifications of financial instruments within the fair value hierarchy are summarized below:

	February 28, 2013	February 29, 2012
<b>Level 1</b>		
Cash	\$ 166,347	\$ 366,034
Short-term deposits	2,537,000	3,502,000
Short-term investments	1,516	4,295
Level 2	-	-
Level 3	-	-
<b>Total</b>	<u>\$ 2,704,863</u>	<u>\$ 3,872,329</u>

The carrying value of receivables, taxes receivable, due from related parties, accounts payable and accrued liabilities, due to property vendors and due to joint venture approximated their fair value because of the short-term nature of these instruments.

### ***Financial Risk Management***

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments are summarized below.

#### *a) Currency Risk*

The Company is primarily exposed to currency fluctuations relative to the Canadian dollar through expenditures that are denominated in US dollars and Mexican pesos. Also, the Company is exposed to the impact of currency fluctuations on its monetary assets and liabilities.

The Company is exposed to foreign currency risk through the following financial assets and liabilities denominated in currencies other than Canadian dollars:

February 28, 2013	Cash and short-term deposits	Receivables	Accounts payable and accrued liabilities
US dollar	\$ 154,765	\$ -	\$ 64,897
Mexican peso	6,337	489,790	515,879
	<b>\$ 161,102</b>	<b>\$ 489,790</b>	<b>\$ 580,776</b>

February 29, 2012	Cash and short-term deposits	Receivables	Accounts payable and accrued liabilities
US dollar	\$ 332,159	\$ 16,309	\$ 132,811
Mexican peso	16,024	244,214	166,037
	<b>\$ 348,183</b>	<b>\$ 260,523</b>	<b>\$ 298,848</b>

At February 28, 2013 with other variables unchanged, a +/-10% change in exchange rates would decrease/increase pre-tax loss by \$7,000.

#### *b) Interest Rate and Credit Risk*

The Company has significant cash balances and no interest-bearing debt. The Company has no significant concentrations of credit risk arising from operations. The Company's current practice is to invest excess cash in investment-grade short-term deposit certificates issued by reputable financial institutions with which it keeps its bank accounts and management believes the risk of loss to be remote. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

Cash and short-term deposits include deposits which are at variable interest rates. Sensitivity to a plus or minus 1% change in rates would affect annual net loss by \$27,000.

Receivables are primarily amounts due from government agencies and are unsecured and non-interest bearing. Amounts due from related parties are recoveries for administrative services provided to companies with certain officers and directors in common, such amounts are based on time spent,

unsecured, non-interest bearing and due on demand. Management believes that the credit risk concentration with respect to receivables is remote.

*c) Liquidity Risk*

The Company manages liquidity risk by maintaining sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short term obligations. As at February 28, 2013, the Company had cash and short term deposit balances of \$2,703,347 (February 29, 2012 - \$3,868,034) to settle current liabilities of \$728,022 (February 29, 2012 - \$508,409).

*d) Commodity Price Risk*

The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market prices of gold and silver. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

## **CAPITAL MANAGEMENT**

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure for its projects for the benefit of its stakeholders. As the Company is in the exploration stage, its principal source of funds is from the issuance of common shares.

In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, enter into joint venture property arrangements, acquire or dispose of assets or adjust the amount of cash and investments.

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing investments, selected with regards to the expected timing of expenditures from continuing operations.

The Company may require additional funding to carry its exploration and development plans and operations through its current operating period.

## **FORWARD-LOOKING INFORMATION**

Forward-looking statements relate to future events or future performance and reflect management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, permitting risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative of these terms or comparable terminology. By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of

the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of resources; possible variations in ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; as well as those factors detailed from time to time in the Company's interim and annual financial statements which are filed and available for review on SEDAR at [www.sedar.com](http://www.sedar.com). Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

#### **ADDITIONAL DISCLOSURE FOR VENTURE ISSUERS WITHOUT SIGNIFICANT REVENUE**

Additional disclosure concerning Northair's general and administrative expenses and resource property costs is provided in the Company's Consolidated Statement of Loss and Deficit and the Consolidated Schedule of Resource Property Costs contained in its audited Consolidated Financial Statements for February 28, 2013 that is available on Northair's website at [www.internationalnorthair.com](http://www.internationalnorthair.com) or on its SEDAR Page Site accessed through [www.sedar.com](http://www.sedar.com)

#### **APPROVAL**

The Board of Directors of Northair has approved the disclosure contained in this MD&A. A copy of this MD&A will be provided to anyone who requests it. The exploration programs described were conducted under the direction of Mr. Fred Hewett, the Company's President and CEO, and a Qualified Person under NI 43-101. Mr. Hewett has reviewed the technical summaries.

#### **ADDITIONAL INFORMATION**

Additional information relating to Northair is on SEDAR at [www.sedar.com](http://www.sedar.com).
