1. Nature of Business

International Northair Mines Ltd. (the "Company" or "Northair") is incorporated under the laws of the Province of British Columbia, Canada. The Company's corporate office, registered address and records office is located at 625 Howe Street, Suite 860, Vancouver, British Columbia.

The condensed interim consolidated statements of financial position and statements of comprehensive loss of the Company are presented in Canadian dollars, which is the functional currency of the Company and of its Mexican subsidiary, Grupo Northair de Mexico, S.A. de C.V. ("Grupo Northair"). The Company trades its shares on the TSX Venture Exchange.

The Company is an exploration stage company which is engaged principally in the acquisition and exploration of mineral properties. These financial statements have been prepared on the assumption that the Company is a going concern, meaning that it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the normal course of operations. The Company has incurred a deficit of $29,851,914 at August 31, 2014 and has no current source of operating revenue. During fiscal 2014 and 2015 the Company raised capital to meet its working capital requirements for fiscal 2014 and part of 2015. The Company's continuation as a going concern is dependent on its ability to attain profitable operations and generate funds therefrom and/or raise funds sufficient to meet current and future obligations. There can be no assurances that management's future plans for the Company will be successful. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern. These financial statements do not include any adjustments to the recoverability and classification of assets and liabilities that might be necessary, should the Company be unable to continue as a going concern.

2. Basis of Presentation

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, these unaudited condensed interim consolidated financial statements do not include all of the information and notes to the financial statements required by IFRS for yearend reporting purposes and should be read in conjunction with the audited annual financial statements of the Company. The accounting policies applied by the Company in these unaudited financial statements are the same as those applied by Northair in its most recent annual financial statements.

Basis of Consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary Grupo Northair. All intercompany balances and transactions have been eliminated.

3. Significant accounting policies

Refer to the audited financial statements for the year ended February 28, 2014 for a summary of significant accounting policies.

New Accounting Pronouncements
Accounting Standards Issued and Effective March 1, 2014

Changes in Accounting Standards

The IASB has issued a number of new standards of which certain applicable ones are disclosed below. Each of the new standards is effective for annual periods beginning on or after January 1, 2014 with early adoption permitted, except IFRS 7 which becomes effective January 1, 2015 and IFRS 9 which has a tentative effective date of January 1, 2018. The following is a brief summary of the new standards:

- IAS 36 – Impairment of assets – disclosure
  This standard has limited scope amendments to disclosure requirements in IAS 36, Impairment of Assets. The adoption of IAS 36 did not result in any change in the financial statements.

- IAS 32 – Financial instruments – presentation
  This standard has been amended to clarify requirements for offsetting of financial assets and financial liabilities. The adoption of IAS 32 did not result in any change in the financial statements.

- IFRS 9 – Financial Instruments – classification and measurement
  This is the first part of a new standard on classification and measurement of financial assets that will replace IAS 39, "Financial Instruments: Recognition and Measurement". IFRS 9 has two measurement categories: amortized cost and fair value. All equity instruments are measured at fair value. A debt instrument is recorded at amortized cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest. Otherwise it is measured at fair value with changes in fair value through profit or loss. In addition, this new standard has been updated to include guidance on financial liabilities and derecognition of financial instruments. The extent of the impact of adoption of IFRS 9 has not yet been determined.

- IFRS 7 – Financial instruments – disclosure
  This standard has been amended to require additional disclosures on transition from IAS 39 to IFRS 9. The extent of the impact of adoption of IFRS 7 has not yet been determined.

Significant accounting estimates and judgments

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, profit and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3. Significant accounting policies- continued

The most significant accounts that require estimates as the basis for determining the stated amounts include exploration and evaluation assets, the valuation of share based payments and the valuation of deferred tax amounts.

Significant assumptions and critical judgments exercised relate to, but are not limited to, the following:

- The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position;
- Environmental rehabilitation is calculated using available market factors;
- The inputs used in accounting for share-based payment expense which is included in the statement of loss and comprehensive loss. These estimates are derived using the Black-Sholes option pricing model or are based on the value of comparable goods and services. Inputs are determined using readily available market data.
- The recognition of deferred tax assets is determined on whether it is more probable than not that these assets will be recovered.
- The determination of the Company's subsidiary's functional currency.

4. Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure for its projects for the benefit of its stakeholders. As the Company is in the exploration stage, its principal source of funds is from the issuance of common shares.

In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, enter into joint venture property arrangements, acquire or dispose of assets or adjust the amount of cash and cash equivalents and investments.

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing investments, selected with regards to the expected timing of expenditures from continuing operations.

The Company may require additional funding to carry out its exploration and development plans and operations subsequent to its current operating period.

Fair value of financial instruments

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
Level 3 – Inputs that are not based on observable market data.

The Company's classifications of financial instruments within the fair value hierarchy are summarized below:

		August 31, 2014		February 28, 2014
Level 1				
Cash	**$**	**300,671**	$	105,604
Short-term deposits		**856,910**		637,000

Financial Risk Management

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments are summarized below.

a) Currency Risk

The Company is primarily exposed to currency fluctuations relative to the Canadian dollar through expenditures that are denominated in US dollars and Mexican pesos. Also, the Company is exposed to the impact of currency fluctuations on its monetary assets and liabilities.

The Company is exposed to foreign currency risk through the following financial assets and liabilities denominated in currencies other than Canadian dollars:

August 31, 2014		**Cash and short-term deposits**		**Receivables**		**Accounts payable and accrued liabilities**
US dollar	**$**	**933,676**	**$**	**385,000**	**$**	**154,350**
Mexican peso		**11,463**		**116,665**		**4,083**
	$	**945,139**	$	**501,665**	$	**158,433**

February 28, 2014		Cash and short-term deposits		Receivables		Accounts payable and accrued liabilities
US dollar	$	36,892	$	-	$	20,970
Mexican peso		14,664		397,258		17,087
	$	51,556	$	397,258	$	38,057

At August 31, 2014, with other variables unchanged, a +/-10% change in exchange rates would decrease/increase pre-tax loss by $129,000.

b) Interest Rate and Credit Risk

The Company has cash balances and no interest-bearing debt. The Company has no significant concentrations of credit risk arising from operations. The Company's current practice is to invest excess cash in investment-grade short-term deposit certificates issued by reputable financial institutions with which it keeps its bank accounts and management believes the risk of loss to be remote. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

Cash and short-term deposits include deposits which are at variable interest rates. Sensitivity to a plus or minus 1% change in rates would affect annual net loss by $11,600.

Receivables include amounts due from government agencies and are unsecured and non-interest bearing. Amounts due from related parties include recoveries for administrative services provided to companies with certain officers and directors in common, such amounts are based on time spent, unsecured, non-interest bearing and due on demand. Management believes that the credit risk concentration with respect to receivables is limited.

(Expressed in Canadian Dollars)

5. Financial instruments – continued

c) Liquidity Risk

The Company manages liquidity risk by maintaining sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short term obligations. As at August 31, 2014, the Company had cash and short term deposit balances of $1,157,581 (February 28, 2014 - $742,604) to settle current liabilities of $277,254 (February 28, 2014 - $162,283).

d) Commodity Price Risk

The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market prices of gold and silver. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

6. Short-term Deposits

		August 31, 2014		February 28, 2014
Security deposits held as collateral for corporate credit cards	**$**	**32,000**	$	32,000

	$	**856,910**	$	637,000

7. Short-term Investments

		August 31, 2014		February 28, 2014
Marketable securities:				
Holdings in companies related by virtue of common directors/officers	**$**	**253**	$	758

The Company classifies its short-term investments as available-for-sale, with revaluation gains and losses recognized in accumulated other comprehensive income. As at August 31, 2014, investments were measured at a fair value of $253.

La Cigarra, Mexico

During the year ended February 28, 2010, the Company entered into an option agreement, through its wholly owned subsidiary Grupo Northair to acquire a 100% interest in the La Cigarra Project located in the State of Chihuahua, Mexico. Grupo Northair acquired a 100% ownership in the concessions by making payments over a five year period totalling US$445,000.

During the year ended February 29, 2012, the Company expanded the project to include the La Borracha concession at a cost of US$35,000.

During fiscal 2013, the Company also acquired surface rights to land adjoining and overlying the La Cigarra Project at a cost of US$825,000 (paid). In addition, a US$200,000 amount will be payable should the Company announce development of a mine on the La Cigarra Project. These rights are capitalized to property and equipment.

During the year ended February 28, 2014, the Company reached an agreement to allow access and conduct exploration on a portion of the land for future construction, mining and processing.

9. Exploration and Evaluation Assets - continued

Parral 1, Mexico

During the year ended February 28, 2013, the Company executed an agreement with DFX Exploration Ltd. ("DFX") to acquire up to a 70% interest in a land position in the area of its La Cigarra Project, consisting of the adjacent and outside properties. Under the terms of the agreement the Company paid $175,000 and issued 450,000 shares, valued at $101,500, during the past two years. In addition, the Company has purchased 1,000,000 common shares in DFX at a price of $0.25 per share and has recorded the share purchase as an acquisition cost. Effective March 24, 2014, the Company entered into an agreement with DFX, amending the original agreement in order to acquire a 100% interest in the adjacent property and a 60% interest in the outside property, subject to a 1% net smelter royalty payable to the original property vendor. To acquire the 100% interest in the adjacent property the Company must pay DFX $450,000 ($200,000 paid prior to August 31, 2014 and $250,000 paid subsequent to August 31, 2014) in cash and issue 5,000,000 common shares (issued with a fair value of $750,000). Subsequent to earning its interest in the adjacent property, the Company will be required to issue an additional 3,000,000 common shares to DFX if it completes 20,000 meters of diamond drilling on the property, commences commercial production on the property or if the Company is acquired by another company. In addition, DFX will be paid an upfront bonus of $0.10 per silver ounce equivalent up to a maximum of 50 million ounces if prior to September 30, 2016, at least 50 million silver equivalent ounces are estimated to exist on the adjacent property in a NI 43-101 technical report prepared by the Company. If silver equivalent ounces are produced from the adjacent property, DFX will be paid $0.10 per silver equivalent ounce from production to a maximum of (i) 135 million ounces, in the event that DFX received the upfront bonus or (ii) 185 million ounces if the upfront bonus was not applicable.

In order for the Company to exercise the option and acquire a 60% interest in the outside property, the Company must incur an aggregate of $500,000 in exploration expenses on the property, after which a joint venture will be formed with all exploration costs paid on a pro rata basis.

Effective May 21, 2014, the Company entered into an Agreement to sell a 2.5% Net Smelter Royalty ("NSR") on the La Cigarra Project for gross proceeds of US$4,000,000. Under the terms of the Agreement the Company received gross proceeds of US$2,250,000 for an initial 1.25% NSR with a further US$1,750,000 (received subsequent to August 31, 2014) to be paid for an additional 1.25%. A finder's fee of US$80,000 was paid in connection with the closing of the transactions.

El Reventon, Mexico

The El Reventon project in Durango, Mexico was acquired by staking a 100% interest in certain claims and by entering into, on July 2006, an option agreement for an additional concession. Under the terms of the option agreement, the Company earned a 100% interest in the optioned concession by making payments totalling US$151,000 (paid).

During the year ended February 28, 2013, the Company entered into an agreement whereby it granted Focus Ventures Ltd. ("Focus") the option to acquire up to 80% interest in the El Reventon Silver Project located in the state of Durango, Mexico. Under the terms of the agreement, Focus could earn its interest by the payment of US$235,000 (US$10,000 received) to the Company over 24 months, incurring US$2,000,000 of exploration expenditures on the property over a three year period and the maintenance of the underlying option agreement and costs. During the year ended February 28, 2014, Focus terminated its option agreement with the Company.

9. Exploration and Evaluation Assets - continued

Sierra Rosario, Mexico

During the year ended February 29, 2012, the Company executed an agreement with Sparton Resources Inc. ("Sparton") and American Consolidated Metals Corp. ("American Consolidated") to facilitate the acquisition by American Consolidated of Sparton's 50% interest in the Sierra Rosario Property located in the state of Sinaloa, Mexico. Sparton held a 51% interest in Sierra Rosario under a Joint Venture Agreement with the Company. In consideration for the Company waving its right of first refusal to match the American Consolidated offer, Sparton transferred a 1% interest and operatorship in the Sierra Rosario Property to the Company concurrently with the completion of the first payment and share issuance from American Consolidated to Sparton under their agreement.

Brandywine, Canada

The Company has maintained the Brandywine claim near Whistler, B.C. The nine unit claim is in good standing until August 3, 2015. Subsequent to August 31, 2014, the Company abandoned the Brandywine claim.
